PILOT-H WIRELESS YACHT CONTROL SYSTEM – WARRANTY POLICY

1. Standard Warranty Period

Maritronix warrants the PILOT-H system to be free from defects in materials and workmanship for a period of 2 years from the date of purchase.

2. Commercial Warranty Period

For commercial, charter, rental, or high-duty marine applications, the warranty period is 1 year from the date of purchase.

3. Warranty Coverage

Maritronix will repair or replace components confirmed to be defective within the warranty period.

Warranty claims require inspection and confirmation by Maritronix or an authorized Maritronix distributor.

4. Void Warranty Conditions

Important for PILOT-H safety:

- Incorrect installation (especially wiring to engines)
- Operation without the mandatory kill switch
- Water ingress due to incorrect enclosure mounting
- Damage from overvoltage, reverse polarity, or short circuit
- Abuse or use outside specified limits
- Unauthorized modification or repair
- Physical damage due to accident or neglect

5. Exclusions

- Batteries
- Damage caused by the boat's electrical system
- Damage caused by third-party engine systems

Proper installation and operation instructions are provided in the PILOT-H Installation & User Manual. For any questions, please contact Maritronix technical support.
